FORD TRANSIT 148 WB EXTENDED LENGTH REAR OR SIDE LIFT

Spacious, comfortable, powerful, and fuel-efficient, the Ford Transit is a mainstay amongst NEMT providers, community homes, and hospitals across the nation. The 2020 Ford Transit with Long Wheelbase measures in at 148 inches between wheels and has varying options for roof heights and cab lengths. The largest of these offerings, the Ford Transit Long-Extended Length, spans a whopping 263.9 inches and offers an impressive 100.5 cubic feet of cargo space behind the last row of stock seating. With room for 1 to 4 wheelchair occupants and up to 12 passengers, the Ford Transit Long-EL offers the most seating customization of all the vehicles in the Sunset Vans lineup. The new 3.5 PFDi (Port Fuel and Direct Injection) V6 Engine cranks out approximately 275 HP and is smaller and more fuel efficient than engines from previous years. The engine comes mated to a new, seamless 10-speed automatic transmission that replaces the previous generation's 6-speed automatic for added fuel efficiency in every road condition. All the amenities you need to keep your passengers comfortable come equipped—A/C, heater, power doors/locks, dome lamps with theater dimming, Bluetooth audio system with USB input jacks, rear view camera, and a multi-function display, to name a few. Along with our fully ADA and CARB-compliant wheelchair conversions expertly engineered right here in Southern California, the Transit comes standard with Pre-Collision Assist Automatic Emergency Braking, Post-Collision Braking, Back-up Alarms, and FMVSS 226 Compliant Glass. Sunset Vans' Ford Transit in Long or Extended Length is the ultimate solution for fleets and providers looking to maximize their passenger shuttling capacity without compromising on performance and value.
